6. ☐ Interview Summary (PTO-413),
Paper No./Mail Date _____.
7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The only base claim, claim 1, covers a rigid multilayer container comprising:
 - inner and outer layers containing aromatic (co)polyester resin, and
 - a core layer comprising:
 - an oxygen scavenging polymers having pendent cyclic olefinic groups
 - a transition metal catalyst,

wherein the oxygen transmission rate of the container is less than about 1.0 cc oxygen per square meter per day at atmospheric pressure and 25 degrees C.

3. The examiner finds that applicants' arguments, as presented on pages 6 and 7 of the 20 November 2003 response, are persuasive regarding the patentability of claims 1-17 in that the references do not teach or suggest all of the features of claim 1. For this reason, the 35 USC 103 rejection has been withdrawn.

Also, she notes that the specification contains a reference to copending parent application SN. 09/127,316 on page 1, lines 4-5.

4. The closest prior art found can be summarized as follows:

Nordstrom (US 3,536,687) teaches polymers having pendent cyclic olefinic groups that crosslink under ambient conditions.

Ching (US 5,744,246) teaches oxygen scavenging ribbons containing oxygen barrier layers and other polymeric layers.

Katsumoto et al (US 6,139,770) teaches multilayer materials containing polyester outer layers and oxygen scavenging layers.

5. None of the cited prior art teaches or suggests containers having all of the features of claim 1.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
